

Security Technology & Business Solutions for Agriculture

HIKVISION

Hikvision's outstanding security technology helps agricultural facilities protect assets and improve operational efficiency. Hikvision's extensive portfolio offers a wide-range of solutions to enhance security and business operations. Solutions include:

- **HikCentral CMS:** Hikvision's central management system (CMS) enables management of one or multiple locations, improving situational awareness and security. HikCentral is a fully scalable system, providing ease of viewing, alarm handling, and critical response.
- **Access Control:** Hikvision technology enhances controlled access points inside and outside of your property. License Plate Recognition (LPR) and access control technology support visitor management by improving ease of identification in authorized areas for visitors and employees.
- **Video Analytics:** HikCentral maximizes asset protection with smart analytics such as perimeter protection, line crossing and exit/entrance detection, and early advanced warning capabilities.
- **Performance Thermal:** Hikvision leverages thermal technology to detect changes in heat and temperature, providing early warnings for fire detection and prevention, as well as detecting moisture levels in grow areas.
- **AcuSense Technology:** AcuSense technology provides accurate human detection, reducing false alarms while improving deterrence with strobe lights and audio alarm messages (on SL models).
- **PTZ and PanoVu:** Hikvision's high performance PTZ and PanoVu panoramic cameras provide surveillance across large open areas, providing farmland properties with improved situational awareness.
- **Better Situational Awareness:** HikCentral elevates situational awareness through dynamic alarm arming, the use of area maps, and the ability to manage multiple locations. This enables accurate monitoring of assets, including livestock, crops, and machinery.
